The death knell has struck. Wave Radio is dead. How have 70 years of Military Research succeeded in producing a completely new and superior communications technology? Radio History gives a stranger walk than paranoid writers ever tell! While citizens were watching television, military research was directed to create an amazing radiation technology far in advance of any system known. Currently and routinely utilised, it has remained a well guarded 'open secret' for decades. The proof patents and relevant research papers have just been retrieved. Facts quell hysteria, but Truth is stranger than fiction. Want the answers? The complete technical history of military projects will show the development of every relevant project preceding HAARP. Only the facts. No hysteria. Complete with communications and weapons patent citations, this book will forever change your view of world events and technology.
